PRECAUTIONS FOR USE

The following safety precautions are given throughout this manual. They must be strictly followed to protect those who install, use or maintain this product as well as to protect players, visitors and property.

For safety reasons.

- The following suggestions should be adhered to:

WARNING

Disregarding could result in serious injury.

CAUTION

Disregarding could result in injury or product damage.

- The following graphic suggestions describe the types of precautions to be followed.

Indicates a care should be taken.

Forbidden.

Indicates a matter which must be performed.

- Precautions to be followed:

Certain procedures require a qualified in-shop maintenance person or industry specialist.

For such instructions, a qualified person must take care of the jobs.

- Otherwise an electric shock, machine trouble or a serious accident may result.
- Replacing the machine parts, inspecting and maintaining the machines and troubleshooting must be assigned only to a qualified in-shop maintenance person or industry specialist. This booklet gives instructions that hazardous jobs in particular must be handled by an industry specialist. Qualified in-shop maintenance person and industry specialist are defined as follows.

Qualified in-shop maintenance person

- A service staff shall have experience in operations of game machines. The staff shall be responsible for assembly, installation, inspection and maintenance of the machine.

Industry specialist

- An industry specialist must be engaged in designing, manufacturing, inspecting and servicing amusement machines. He or she must have an education in electrical, electronic and mechanical engineering and routinely maintain and repair amusement machines.

PRECAUTIONS FOR USE

WARNING

Be sure to consult an industry specialist when setting up, moving or transporting this product.

- This product should not be set up, moved or transported by any one other than an industry specialist.
- When installing this product, set the 4 leg levelers evenly on the floor and make sure that the product is installed stably in a horizontal position. Unstable installation may result in injury or accident.
- When installing this product, do not apply undue force on movable parts. Otherwise, injury and accident may result, or the product may be damaged.

The machine for indoor usage only does not install outside.

Do not set the game machine up near emergency exits.

Protect the game machine from:

- Rain or moisture.
- Direct sunlight.
- Direct heat from air-conditioning and heating equipment, etc..
- Hazardous flammable substances.
- Otherwise an accident or malfunction may result.

Do not place containers holding chemicals or water on or near the game machine.

Do not place objects near the ventilating holes.

Do not bend the power cord by force or place heavy objects on it.

Never plug or unplug the power cord with wet hands.

Never unplug the game machine by pulling the power cord.

CAUTION

Be sure to use indoor wiring within the specified voltage requirements. For extension cord, use the specified rating or more.

Be sure to use the attached power cord.

Never plug more than one cord at a time into the electrical receptacle.

Do not lay the power cord where people walk through.

Be sure to ground this product.

Do not exert excessive force when moving the machine.

For proper ventilation, keep the game machine 100mm(4") away from the walls.

Do not alter the system related dipswitch settings.

PRECAUTIONS FOR USE

WARNING

If there is any abnormality such as smoke, bad smell or abnormal noise being emitted from the machine, immediately turn OFF the main power switch and unplug the power cord from the receptacle to stop operating it.

- Using the machine in abnormal conditions could result in fire or accidents.

In case of abnormality

1. Turn OFF the main power switch.
2. Unplug the power cord from the receptacle.
3. Contact your nearest dealer.

Do not leave the power cord plugged in improperly or covered with dust.

- Doing so could result the power cord periodically.

CAUTION

Do not use this product anywhere other than industrial areas.

- Using in a residential area or an area next to a residential area could affect signal reception of radios, television sets, telephones and etc..

- Do not give shock the surface of glass products.

- Please do not play this game if

- When you do drinking;
- When your physical condition is not normal;
- When you are in pregnancy;
- When you have on a pulse controller;
- When you have recently experienced a cramp or fainting away while watching TV.

- Avoid excessive force/shock while playing/moving the game.

- While do games, pay attention to surrounding.

Do not plug or unplug the power cord with wet hands.

In handling the power cord, follow the instructions below.

- | | |
|---|--|
| • Do not damage the power cord. | • Do not modify the power cord. |
| • Do not bend the power cord excessively. | • Do not twist the power cord. |
| • Do not heat the power cord. | • Do not pull the power cord. |
| • Do not bind the power cord. | • Do not stand on the power cord. |
| • Do not sandwich the power cord. | • Do not drive a nail into the power cord. |

If the power cord or power plug becomes damaged, stop using the machine immediately and ask your nearest dealer to replace the parts.

- * **Electromagnetic wave may cause unexpected noise from speaker.**

- * **Please wear gloves when assembling or disassembling to avoid cutting your hands on sharp parts inside the product.**

PRECAUTIONS FOR USE

WARNING

Be sure to turn OFF the main power switch and unplug the power cord from the receptacle before inspecting or cleaning the machine.

When replacing parts, be sure to use parts of the correct specifications. Never use parts other than the specified ones.

Opening inside the machine shall be done by machine specialist only as high electric current is being sent inside. For game machine with monitor, a care should be taken while opening its back door. If not, a damage to the inside parts or the monitor may occur.

If the sub power switch of the service panel is turned OFF without turning OFF the main power switch of the power supply unit, some parts in the units remain live. When opening the back door, be sure to turn OFF the main power switch and unplug the power cord from the receptacle.

Strictly refrain from disassembly and repair of parts which are not indicated in this manual, as well as settings and remodeling.

To clean the game machine, wipe it with a soft cloth dampened in a neutral detergent.

- Using thinner or other organic solvent or alcohol may decompose the material.
- Electrical shock or equipment failure could be caused by water entering the inside of the machine.

CAUTION

Components in the game are sensitive to vibrations and impact. Care should be used when moving and transporting the game machine.

Be sure not to let the machine tip over.

Before moving the machine, be sure to turn OFF the main power switch, unplug the power cord from the receptacle and remove the power cord from the machine.

Before moving take the machine, off the levelers and move it on the casters.

Avoid excessive force while moving the machine.

PRECAUTIONS IN HANDLING

- When setting up, inspecting, maintaining, moving or transporting this product, follow the procedures and instructions set forth in this manual and perform such work safely.
- Do not set up, handle, inspect, maintain, move or transport this product under conditions equivalent to the condition of "WARNING" or "CAUTION" specified in this manual.
- If a new owner is to have this product as a result of transfer, and etc., be sure to give this manual to the new owner.

PRÉCAUTION D'EMPLOI

Les consignes de sécurité suivantes sont données dans ce manuel. Elles doivent être strictement suivies pour protéger ceux qui les installent. Utiliser ou entretenir ce produit pour la sécurité des utilisateurs, des visiteurs et des biens.

Pour des raisons de sécurité.

- **Les suggestions suivantes doivent être respectées:**

ATTENTION

Le non-respect peut entraîner des blessures graves.

PRUDENCE

Le non-respect peut entraîner des blessures ou des dommages au produit.

- **Les suggestions graphiques suivantes décrivent les types de précautions à prendre.**

Indique qu'attention est requise.

Interdit.

Indique que quelque chose doit être effectuée.

- **Les précautions à prendre :**

Certaines procédures exigent une personne de maintenance qualifiée en atelier ou un spécialiste de l'industrie. Pour ces instructions, une personne qualifiée doit prendre soin des travaux.

- Sinon, un choc électrique, un dysfonctionnement de la machine, ou un accident grave peut en résulter.
- Remplacement des pièces de machines, l'inspection et la maintenance des machines, et le dépannage doit être attribué qu'à une personne de maintenance qualifiée en atelier ou spécialiste de l'industrie. Cette brochure donne des instructions que les emplois dangereux, en particulier, doivent être traités par un spécialiste de l'industrie. La personne de maintenance qualifiée en atelier et le spécialiste de l'industrie sont définis comme suit.

La personne de maintenance qualifiée en atelier

- Un personnel de service doit avoir de l'expérience dans les opérations de machines de jeux. Le personnel est responsable pour l'assemblage, l'installation, l'inspection et l'entretien de la machine.

Le spécialiste de l'industrie

- Un spécialiste de l'industrie doit être engagé dans la conception, la fabrication, l'inspection et l'entretien des appareils d'amusement.
Il ou elle doit avoir une formation en génie électrique, électronique et mécanique, et de maintenir régulièrement et de réparer les appareils d'amusement.

PRÉCAUTION D'EMPLOI

ATTENTION

Si il y a une anomalie comme fumée, mauvaise odeur ou bruit anormal émis par la machine,  couper immédiatement l'interrupteur principal et débranchez le câble d'alimentation de la prise pour arrêter son fonctionnement.

- L'utilisation de l'appareil dans des conditions anormales peut provoquer un incendie ou un accident.

En cas d'anomalie

1. Mettez l'interrupteur principal sur ARRÊT.
2. Débranchez le câble d'alimentation de la prise.
3. Contactez votre revendeur le plus proche.

Ne pas brancher le câble d'alimentation incorrectement ou le laisser être recouvert de poussière. 

Cela pourrait nuire le câble d'alimentation.

PRUDENCE

Ne pas utiliser ce produit ailleurs que dans les zones industrielles. 

- L'utiliser dans une zone résidentielle ou d'une zone à côté d'un quartier résidentiel pourrait nuire à la réception des radios, téléviseurs, téléphones, etc.
- Ne donnez pas de choc à la surface d'un produit en verre.

- S'il vous plaît ne pas jouer à ce jeu.
 - Quand vous buvez;
 - Lorsque votre condition physique n'est pas normale;
 - Lorsque vous êtes dans une période de grossesse;
 - Lorsque vous avez un contrôleur d'impulsion;
 - Lorsque vous avez récemment subi une crampe ou évanouissement en regardant la télévision.
- Évitez une force excessive / un choc pendant la lecture / de déplacer le jeu.
- Quand vous jouez les jeux, faites attention aux alentours.

Ne pas brancher ou débrancher le câble d'alimentation avec les mains mouillées. 

Dans la manipulation du câble d'alimentation, suivez les instructions ci-dessous. 

- | | |
|--|---|
| • Ne pas endommager le câble d'alimentation. | • Ne pas modifier le câble d'alimentation. |
| • Ne pas plier le câble d'alimentation de manière excessive. | • Ne tordez pas le câble d'alimentation. |
| • Ne pas chauffer le câble d'alimentation. | • Ne tirez pas sur le câble d'alimentation. |
| • Ne pas lier le câble d'alimentation. | • Ne montez pas sur le câble d'alimentation. |
| • Ne pas prendre en sandwich le câble d'alimentation. | • Ne pas mettre un clou dans le câble d'alimentation. |

Si la fiche du câble d'alimentation ou est endommagé, cessez immédiatement d'utiliser la machine et demandez à votre revendeur le plus proche de remplacer les pièces.

PRÉCAUTION D'EMPLOI

ATTENTION

Assurez-vous de consulter un spécialiste de l'industrie lors de la mise en place, du déplacement ou le transport de ce produit.

- Ce produit ne doit pas être mis en place, déplacé ou transporté par une quelconque autre qu'un spécialiste de l'industrie.
- Lors de l'installation de ce produit, installez 4 niveleurs de pieds uniformément sur le sol et assurez-vous que le produit est installé de façon stable dans une position horizontale. Une installation instable peut entraîner des blessures ou un accident.
- Lors de l'installation de ce produit, ne pas appliquer une force excessive sur les pièces mobiles. Sinon, des blessures et des accidents peuvent y résulter, ou le produit peut être endommagé.

La machine pour une utilisation en intérieur uniquement, ne pas installer à l'extérieur.

N'installez pas la machine de jeu près des issues de secours.

Protéger la machine de jeu de:

- L'humidité ou la pluie.
- La lumière directe du soleil.
- La chaleur directe de la climatisation et du chauffage, etc...
- Des substances inflammables dangereuses.
- Sinon, un accident ou un dysfonctionnement.

Ne pas placer les récipients contenant des produits chimiques ou de l'eau sur ou près de la machine de jeu.

Ne placez pas d'objets à proximité des orifices de ventilation.

Ne pas plier le cordon d'alimentation par la force ou de placer des objets lourds au-dessus.

Ne jamais brancher ou débrancher le cordon d'alimentation avec les mains mouillées.

Ne jamais débrancher la machine de jeu en tirant le câble d'alimentation.

PRUDENCE

Veillez à utiliser le câblage intérieur selon les exigences de tension spécifiées. Pour une rallonge, utilisez la notation spécifiée ou plus.

Veillez à utiliser le cordon d'alimentation fourni.

Ne jamais brancher plus d'un cordon à la fois dans la prise électrique.

Ne pas poser le cordon d'alimentation où les gens marchent à travers.

Soyez sûr de mettre à la terre ce produit.

Ne pas exercer une force excessive lors du déplacement de la machine.

Pour une ventilation correcte, garder la machine de jeu 100mm (4 ") loin des murs.

Ne pas modifier les réglages des commutateurs DIP liées au système.

PRÉCAUTION D'EMPLOI

⚠ ATTENTION

Veillez à éteindre l'interrupteur d'alimentation principale et débranchez le cordon d'alimentation de la prise avant d'inspecter ou de nettoyer la machine. 

Lors du remplacement des pièces, veillez à utiliser une partie des spécifications correctes. Ne jamais utiliser de pièces autres que celles spécifiées. 

L'ouverture à l'intérieur de la machine doit être effectuée par le spécialiste de la machine seulement, comme le courant électrique élevé est transmis à l'intérieur. Pour la machine de jeu avec le moniteur, un soin doit être pris lors de l'ouverture de sa porte arrière. Si non, une détérioration des pièces à l'intérieur ou à l'écran peut se produire. 

Si l'interrupteur secondaire du panneau de service est éteint sans éteindre le commutateur d'alimentation principale de l'unité d'alimentation, certaines parties dans les unités restent sous tension. Lors de l'ouverture de la porte arrière, veillez à éteindre l'interrupteur d'alimentation principale et débranchez le cordon d'alimentation de la prise. 

Il est strictement conseiller de s'abstenir de démonter et de réparer des pièces qui ne sont pas indiqués dans ce manuel, ainsi que les paramètres et le remodelage. 

Pour nettoyer la machine de jeu, l'essuyer avec un chiffon doux imbibé avec un détergent neutre.

- L'utilisation plus mince d'un autre solvant organique ou de l'alcool peut décomposer le matériel.
- Un choc électrique ou une défaillance de l'équipement pourraient être causés par la pénétration de l'eau à l'intérieur de la machine.

⚠ PRUDENCE

Les composants de la machine de jeu sont sensibles aux vibrations et aux chocs. Il faut faire attention lors du déplacement et le transport de la machine de jeu. 

Veillez à ne pas laisser la machine se renverser.

Avant de déplacer la machine, veillez à éteindre l'interrupteur d'alimentation principale, débranchez le cordon d'alimentation de la prise et débranchez le cordon d'alimentation de la machine. 

Avant de déplacer la machine, la mettre hors des niveleurs et le déplacer sur les roulettes.

Éviter une force excessive lors du déplacement de la machine.

PRÉCAUTIONS LORS DU MANIEMENT

- Lors de la mise en place, l'inspection, l'entretien, déplacement ou le transport de ce produit, suivez les procédures et les instructions énoncées dans ce manuel et effectuer ce travail en toute sécurité.
- Ne pas mettre en place, manipuler, inspecter, entretenir, déplacer ou transporter ce produit dans des conditions équivalentes à l'état de "ATTENTION" ou "PRUDENCE" spécifiée dans ce manuel.
- Si un nouveau propriétaire obtient ce produit à la suite d'un transfert, etc., soyez sûr de donner ce manuel au nouveau propriétaire.

★10 BILLS->	Setting for play/10 bills	1~1000, Increment by 1, Default	175	120
★20 BILLS->	Setting for play/20 bills	1~1000, Increment by 1, Default	400	240
SAVE AND EXIT	Save and exit	PRESS SELECT BUTTON AND CHOOSE [YES] OR [NO]		
CANCEL AND EXIT	Cancel and exit			

CAUTION! If the value of the setting item with the ★ mark is changed, the internal BOOKKEEPING DATA entry and GAME DATA & CREDIT information will also be erased.

5-2-3. GAME SETTING Sub menu

LCD display	[INT-A, NJ]	[INT-D]	Description	Range
★GAME PRESET	A	A	Preset setting for WHEEL, REEL, DOUBLE REEL The preset for each game is changed according to this setting	A~D, Default
★WHEEL SET	=>	=>	Wheel score setting	Refer to menu 1-3-1
★REEL SET	=>	=>	Reel score setting	Refer to menu 1-3-3
★DOUBLE REEL SET	=>	=>	Double reel score setting	Refer to menu 1-3-5
REEL COUNT	ON	ON	Set display on accumulated reel game count at token FND	OFF, ON
REEL STOP	OFF	OFF	Enable stop button in reel game	OFF, ON
★REEL LIMIT	OFF	OFF	Set the maximum cumulative number of reel games	OFF, 1~30
★REEL TICKETS	0	0	Set the number of tickets that you pay instead if you exceed the maximum accumulated number of reel games	0~100, increase by 1 unit
CAUTION! Notes on setting the following 3 items : REEL UP TIME, REEL DOWN TIME, REEL ADD SPEED			If the REEL drive unit has a problem recognizing the SENSOR or SWITCH due to changes in the surrounding temperature, the setting value needs to be changed. If the front or rear INT1 sensor mounted on the REEL is defective or the UP, DOWN SWITCH is defective, changing the setting value of this item may cause damage to the device. Therefore, when changing the setting value, we recommend checking the sensor or SWITCH in TEST mode and requesting a change of the setting value only if there is no problem.	
REEL UP TIME	12	12	Set maximum reel up time	12~50, increase by 1 unit
REEL DOWN TIME	10	10	Set maximum reel down time	10~50, 1 unit increase
REEL ADD SPEED	0	0	Set the movement speed to increase when reeling up or down	0~100, increments of 1
TILT	NOR MAL	NOR MAL	Cabinet impact detection settings	NONE, SLOW, NORMAL, FAST
WARNING TIME	10s	10s	Set cabinet impact detection alarm time s:sec, m:min, game stopped while alarm goes off	5s, 10s, 20s, 30s, 40s, 50s, 1m, 2m, 3m, 5m, 10m, Default 10s
ATTRACT VOLUME	60	60	Demo volume setting	OFF, 10~100, Increment by 10
PUSHER DEMO	AUTO	AUTO	Setting up pusher action during demo OFF : ACTION STOP, ON : ALWAYS ACTION, AUTO : ACTION/STOP When set to AUTO, it operates for 30 seconds at approximately 5-minute intervals	OFF, ON, AUTO, Default
WHEEL DEMO	ON	ON	Set WHEEL LED during demo	OFF, ON
SHOOTER DEMO	ON	ON	SHOOTER FND and LAMP settings during demo	OFF, ON
SPIN LED DEMO	ON	ON	Set SPIN LED during demo	OFF, ON
REEL DEMO	ON	ON	REEL action settings during demo	OFF, ON
SAVE AND EXIT			Save and exit	PRESS SELECT BUTTON AND CHOOSE [YES] OR [NO]
CANCEL AND EXIT			Cancel and exit	

CAUTION! If the value of the setting item with the ★ mark is changed, the internal BOOKKEEPING DATA entry and GAME DATA & CREDIT information will also be erased.

- SOUND TEST [Reference]

LCD Display	Setting	Description
TEST	CHANNEL	1P - ONE, 2P - TWO Sequential output tests
	BGM	Background music output test
	FX	Sound effect output test
	LEFT, RIGHT : Select CHANNEL, BGM, FX, VOC, SELECT : Off/On	
EXIT	Back to previous menu	

5-7. PLAY FIELD SETUP

PLAY FIELD SETUP			
Select item with UP, DOWN, LEFT, select 1P, 2P, ALL with RIGHT, and execute with SELECT			
When an error occurs, an error recovery attempt can be attempted by pressing the SERVICE/RESET button			
The remaining number of times is displayed in PLAYS FND			
LCD Display		Description	Range
★PUSHER 500	1P	Only MEDAL, BALL, and CARD work to create a basic game state	1P, 2P, ALL
★ALL 1,000	1P	Fire the medal 1,000 times and proceed with the entire operation. When the shooting game is entered twice, the reels operate once every two times.	1P, 2P, ALL
★ALL 3,000	1P	Fire the medal 3,000 times and proceed with the entire operation. When the shooting game is entered twice, the reels operate once every two times.	1P, 2P, ALL
★ALL 100,000	1P	Fire the medal 100,000 times and proceed with the entire operation. When the shooting game is entered twice, the reels operate once every two times.	1P, 2P, ALL
		F1 FND Number of medals remaining in the front F2 FND Number of medals remaining in the rear F3 FND Count remaining until card dispensing F4 FND Number of remaining card dispensing If the target is not hit, press each P button to adjust the medal firing position Timing is displayed at FND F7 from 0 to 15 Target accuracy can be adjusted from 0 to 99% by pressing the SERVICE button, in 10% increments. It is controlled It is displayed with DOT at FND F7. (5.0 in case of 50%) FND F7 displays the firing location and hit rate alternately	
EXIT		Exit	

CAUTION! If the value of the setting item with the ★ mark is changed, the internal BOOKKEEPING DATA entry and GAME DATA & CREDIT information will also be erased.

5-8. ERROR CODE

ERROR CODE	FND DISPLAY	ERROR TYPE	NOTE	CHECK LIST
E001	E001	MEMORY	Setup save data memory Read & Write Failed	Enter SETUP to check and save setup settings (replace MAIN BOARD if you continue to have problems)
E101	E101	Coin acceptor	Coin sensor signal still present	1. Check coin acceptor 2. Check Deep Switch N/O Settings
E103	E103	Bill acceptor	Bill sensor signal still present	1. Check bill acceptor 2. Check Deep Switch N/O Settings
E201	E201	Communication	Sound communication failure	1. Check in test mode 2. Check sound memory
E202	E202		WS2813 communication failure	1. Check WS2813 board 2. Check mainboard and communication status
E301	E301	REEL	Front/rear sensor signals continue to be detected	1. Test front/rear INT1 sensor
E302	E302		Front/rear operation time out	1. Test front/rear INT1 sensor
E303	E303		Up position switch not detected at forward start	1. Test up micro switch
E304	E304		Up position switch not detected at reverse start	1. Test up micro switch
E305	E305		Up/down operation time out	1. Test up/down micro switch
E306	E306		Front position switch not detected at down start	1. Test front INT1 sensor
E307	E307		Front position switch not detected at up start	1. Test front INT1 sensor
E308	E308		Reel rotation sensor signal is still detected	1. Reel position and forward/backward sensor test * Please refer to the error video
E309	E309		Unknown position	1. Sensor malfunction
E310	E310		Up and down switches detected simultaneously	1. Up and down micro switch test
E401	E401	PUSHER	No rotational signal	1. Test INT1 sensor
E402	E402		Sensor signal continuously detected	1. Test INT1 sensor
E501	E501	WHEEL	Target sensor signal is still detected	1. Test target INT1 sensor
E502	E502		Wheel encoder continuously detected	1. Test wheel encoder INT1 sensor

E601	E601	SHOOTER HOPPER	No front medal or jam	1. Check medal status
E602	E602		Front sensor signal continued	1. Check medal dispensing sensor
E604	E604	LOADER HOPPER	No rear medal or jam	1. Check medal status
E605	E605		Rear sensor signal continued	1. Check medal dispensing sensor
E802	E801	DIVIDER	Operation Timeout	1. Operation Test 2. Test front/rear INT1 sensor
E803	E802		Sensor signal continuously detected	1. Operation Test 2. Test front/rear INT1 sensor
E901	E901	ROLLER	Encoder sensor signal is still detected	1. Test motor and INT1 sensor
E902	E902	SHOOTER	Solenoid failure or rear ball stuck or front sensor bad	1. Check the ball hook status 2. If the ball has not come down Test the solenoid operation 3. If the ball has come down Test the front sensor
E903	E903		Front sensor & micro switch problem	1. Check the front sensor operation status 2. Check dust around sensor 3. Check operation of micro switches (7 pcs)
E904	E904		After the ball is fired Front sensor not detected Or micro switch not detected Or ball jammed	1. Check the ball hook status 2. If the ball has come down Test the front sensor operation status 3. If the ball has passed through the hole Test the micro switch operation status
Et01	Et01	TICKET	No ticket	1. Check ticket dispenser
Et02	Et02		Ticket jam	1. Check ticket dispenser
Et03	Ec03	CARD DISPENSOR	No card	1. Check card dispenser
Et04	Ec04		Card jam	1. Check card dispenser
TIL1	TILT1	TILT	Shock detection across devices	1. TILT error disappears after a certain period of time 2. Location if not destroyed TILT SENSOR CHECK
TIL2	TILT2		1P button plate shock detection	
TIL3	TILT3		2P button plate shock detection	

* If the ball does not come down during the SHOOTER game and the voice telling you to shoot the ball keeps coming out, please test the operation of the front IR sensor.

6. MAINTENANCE

6-1. Precautions for turning on the power

: When it is newly turned on after power is turned off, the power must be turned on after 10 seconds.

6-2. When installing the device

: Connect the device with a ground outlet to which fg is connected.

6-3. Main board management

: Dust removal on the main board will be carried out once a month.

6-4. Basic product management : Clean it regularly

6-5. This product should only be used for indoor use

ANDA MAIN V1.6	AZZZ0PCB232		

- WHAT TO DO IF THERE IS NO MEDAL ON THE FRONT HOPPER

* In the following cases, there may be no medal on the front HOPPER.

- 1) When medals pile up at the top of the MOVING PUSHER MAIN PANEL of the PUSHER PART and do not come down
: ① Place the accumulated medals inside the ② GUIDE BKT and replenish the medals with the FRONT HOPPER.

[PUSHER]

[FRONT HOPPER]

- 2) When the REAR HOPPER is full of medals, or even the MEDAL DIVIDE GUIDE is full.
: ① Put the stacked medals of the MEDAL DIVIDE GUIDE ② inside the GUIDE BKT and move them to the FRONT HOPPER. Replenishment of medals.

[REAR HOPPER]

[FRONT HOPPER]

- 3) CARD OUTLET GUIDE When medals are piled up inside or have fallen inside the product.
: ① Take out the medal inside, or collect the medal from inside the product and ② put it inside the GUIDE BKT. Replenish medals with HOPPER.

[CARD OUTLET GUIDE]

[FRONT HOPPER]

- 4) Place 200 EA of medals [100 EA per P] supplied as SPARE inside the ② GUIDE BKT of the corresponding P to FRONT

* See FRONT HOPPER image above

12-23. MEDAL DIVIDER MOTOR & SENSOR ERROR (E801_E802)

ERROR or LOCATION	P1	P2																																			
		<table><tr><td>1</td><td>Over 11V</td><td>ON</td></tr><tr><td>2</td><td>GND</td><td>OFF</td></tr></table> <table><tr><td>8</td><td>7</td><td>6</td><td>5</td></tr><tr><td>4</td><td>3</td><td>2</td><td>1</td></tr></table> <table><tr><td>1</td><td>Over 4.5V</td><td></td></tr><tr><td>2</td><td>Below 1.0V</td><td></td></tr><tr><td>3</td><td>Over 4.0V</td><td>detect</td></tr><tr><td>FR</td><td>Below 0.1V</td><td>undetected</td></tr><tr><td>4</td><td>Over 4.0V</td><td>detect</td></tr><tr><td>RE</td><td>Below 0.1V</td><td>undetected</td></tr><tr><td>5</td><td>GND</td><td></td></tr></table>	1	Over 11V	ON	2	GND	OFF	8	7	6	5	4	3	2	1	1	Over 4.5V		2	Below 1.0V		3	Over 4.0V	detect	FR	Below 0.1V	undetected	4	Over 4.0V	detect	RE	Below 0.1V	undetected	5	GND	
1	Over 11V	ON																																			
2	GND	OFF																																			
8	7	6	5																																		
4	3	2	1																																		
1	Over 4.5V																																				
2	Below 1.0V																																				
3	Over 4.0V	detect																																			
FR	Below 0.1V	undetected																																			
4	Over 4.0V	detect																																			
RE	Below 0.1V	undetected																																			
5	GND																																				

► SOLUTION

1. TEST MODE→DIVIDER TEST, INPUT TEST

- F1 FND: Operation status display
ON(on), OFF(oF)
- F2 FND: Current direction indicator,
blinks when moving
FRONT(Fr), REAR(rE)
- F3 FND: SENSOR status display
FRONT POSITION(FRONT), REAR POSITION(REAR)
Not detected(0), detected(1)
- DIVIDER FRONT SENSOR: 1P(G1), 2P(T1)
- DIVIDER REAR SENSOR: 1P(G2), 2P(T2)

2. CHECK :

- 1) Check the assembly condition of the motor mechanism
- 2) Check BKT and sensor assembly status (P1)
- 3) Check wiring connection status (P1)
- 4) MOTOR voltage check (P2)
- 5) MOTOR replacement
- 6) MOTOR I/O PCB replacement
- 7) Check front sensor voltage (P2)/Check INPUT MODE
- 8) Front sensor PCB replacement
- 9) Check rear sensor voltage (P2)/Check INPUT MODE
- 10) Rear sensor PCB replacement
- 11) Main PCB replacement

		Over 3.5V	undetected																									
1	4	GND																										
1	Over 11V	ON																										
2	GND	OFF																										

► SOLUTION

1. TEST MODE→SHOOTER TEST, INPUT TEST

- F1~F6 FND: Shows 6,5,4,3,2,1
- F7 FND: SENSOR status display
FRONT POSITION(FRONT), REAR POSITION(REAR)
Not detected(0), detected(1)
- F8 FND: After launching the ball, the location blinks
1~6, 7(Top)
- L1~L6 LAMP: When the ball enters during
the entire flashing operation, only that location
blinks
- SHOOTER REAR SENSOR: 1P(C2), 2P(P2)

2. CHECK :

- 1) Check SOLENOID and equipment assembly status (P1)
- 2) Check sensor assembly status (P1)
- 3) Check for ball jams
- 4) Check wiring connection status (P1)
- 5) SOLENOID voltage check (P2)
- 6) SOLENOID replacement
- 7) Check sensor voltage (P2)
- 8) Sensor PCB replacement
- 9) Main PCB replacement

1	Over 4.5V																															
2	Below 0.1V																															
3	Over 3.0V	detect																														
	Below 0.1V	undetected																														
4	GND																															
1	Over 9.0V	ON																														
2	GND	OFF																														

► SOLUTION

1. TEST MODE → CARD DISPENSOR TEST, INPUT TEST

- F1 FND: Operation status display ON(on), OFF(oF)
- F2 FND: ENCODER SENSOR status display, Not detected(0), detected(1)
- F3 FND: CARD quantity display waiting for discharge
- F4 FND: Displays discharged CARD quantity
- SHOOTER REAR SENSOR: 1P(H1), 2P(U1)

2. CHECK :

- 1) Check for presence of card and jam (P1)
- 2) Check assembly status of equipment
- 3) Check sensor assembly status (P1)
- 4) Check wiring connection status (P1)
- 5) Check sensor voltage (P2)
- 6) Sensor PCB Replacement
- 7) Main PCB replacement

PART NAME	CODE	PART NAME	CODE
PHOTO INT-1 PCB ASS'Y	AZZZ0PCB103	ANDA MAIN V1.6	AZZZ0PCB232

12-28. TICKET ERROR (Et01_Et02)

► SOLUTION

1. TEST MODE → TICKET TEST

2. CHECK :

- 1) Check whether TICKET JAM
- 2) Check the cable connection status
- 3) REPLACE TICKET DISPENSER
- 4) MAIN PCB replacement

PART NAME	CODE	PART NAME	CODE
TICKET DISPENSER	MZZZ0TID007	ANDA MAIN V1.6	AZZZ0PCB232

* HOW TO ADJUST THE GAP OF CARD DISPENSER

1

- Remove the cover by removing the rear fixing bolts.[Bolt 4ea]

2

- Unlock little bit of fix bolt 2ea at No.1.

3

- Prepare CARD SETTING JIG as a picture.

4

- Insert the CARD SETTING JIG at No.2.
(lower side of black acrylic)

5

- Lock the bolt section 2 pressing upper side of black acrylic between the gaps of No.3 while the card is located.

6

- Check if it is tight when you try to insert the CARD SETTING JIG again as left picture. If it is easy to insert or impossible to insert, go back to section 2 and work again.
- Gap between the arrows of left picture. (No.2 of section 4)
Allowable value: 1.1~1.3 mm
Thickness of normal card: 0.8 mm

7

- After processing until section 9, run operation test.
TEST MODE -> CARD DISPENSER TEST

ANDAMIRO WARRANTY POLICY

Andamiro warrants to the original purchaser that all of its products will be free from defects in material and workmanship.

Andamiro warrants the parts from date of shipment as follows.

- One Year Limited Warranty : Electronic Boards
- 6 Months Limited Warranty : Moving Parts

For any key components within the warranty period, Andamiro will repair or replace defective components free of charge.

When placing a warranty request, the customer is requested to furnish the following information:

1. Name of the game.
2. Serial Number of the game.
3. A Detailed Description of the defect/s experienced.

This warranty does not apply to the defects caused due to misuse or abuse of the product.

Any alterations made to game or game parts will void this warranty.

For warranty details on our product range please visit our website, www.andamiro.com.
